

KINGSDOWN[®]

care, made easier

motion care Xpress[™]

motion care Xpress™

Designed to Move

The position of fully electric Motion Care Xpress™ base can be adjusted with the press of a button to accommodate whatever sleeping or resting position is desired. Though they are similar to those often found in hospital rooms, these beds combine both residential and hospital bed characteristics. They are ideal for long-term care facilities, home use or for temporary healthcare facilities during the COVID-19 crisis.

Key Features

- 5/8" Melamine
- North American grade steel
- 2 DC Actuators
- Whisper Quiet
- Integrated Battery Back-up
- 4 Telescoping Height Legs
- Open Architecture
- Wireless Remote Control
- Load Capacity : 1,000 lbs/455 kgs

Wireless Remote Control

- Backlit buttons light up when pressed for visibility in low light environments.
- Remote works without pointing it directly at the receiver
- Single button to automatically return mattress to a flat position.

Ergonomic Side Rails

- Ergonomic side rails design allows safe egress and ingress zone for patients and maximizes proper positioning when getting in and out of bed.
- Adjusts from 4" to 13".

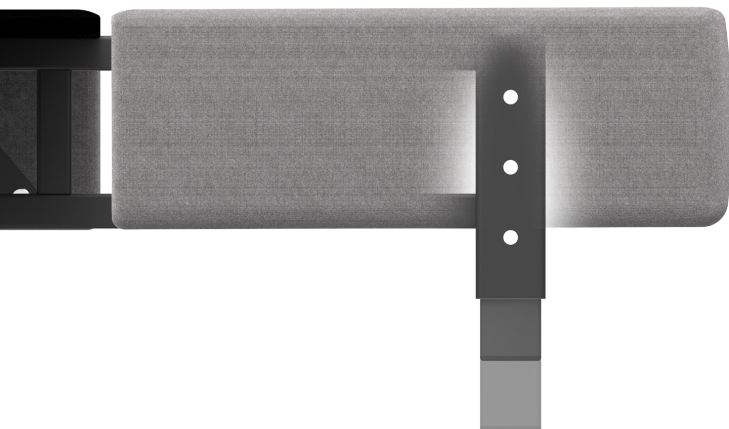

Set - Up Option

- Without the legs attached, the bed is able to function on the floor, a platform bed, slats, or on a metal frame. The height of the bed without legs is 8".

Telescoping Height Legs

- The bed features legs with telescoping height for precise adjustability at 9", 11" and 13".
- Maximum height : 13"

User-Friendly Cleaning Architecture

- Open architecture to simplify cleaning and mattress installation
- No special tools needed for cleaning
